## WASH STATION OPTIONS

09

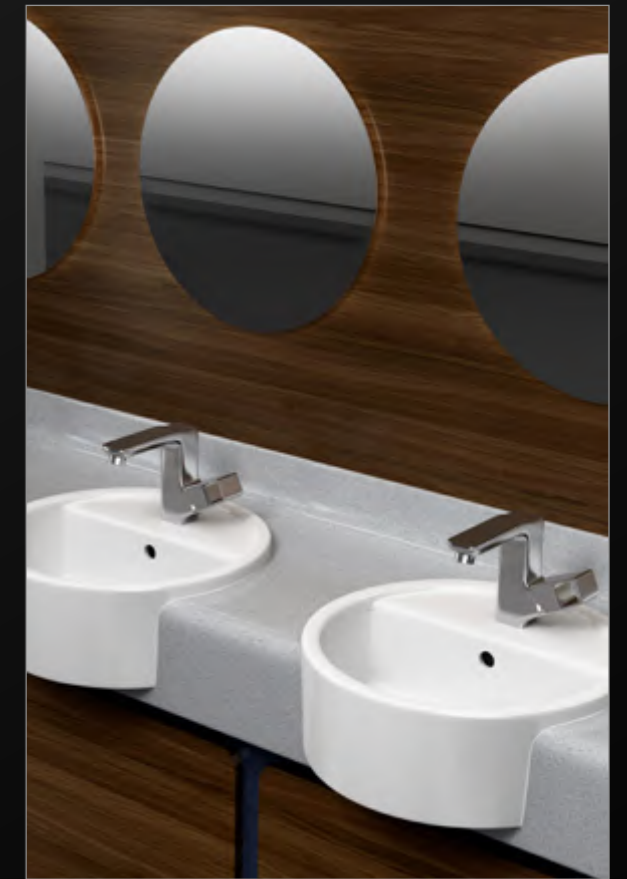

**WASHBOX™** A cuboid basin pod formed from solid surfacing, with integral bowl. Wall or duct-mounted, this can be complemented with a variety of tap and mirror options. Beautifully minimal, chic design.

**WASHPOD™** A combination of preformed solid grade laminate elements forming vanity top, mirror back and light pelmet. Duct panel mounted for installation with optional halogen light, wall-mounted tap and vessel basin. Eye-catching individuality and style.

**WASHTROUGH™** A continuous, all-in-one trough. Use with optional sensor taps to produce an eco-friendly environment. Striking clean lines and a contemporary, sociable feel.

**WASHPOINT™** A high pressure laminate vanity top for recessed basins, with postformed upstand and downstand, and base panels to complement the duct panel system. Pure and simple with a touch of class.

# FINISH

## URINAL SCREEN OPTIONS

10

**SAILAWAY™** The sail-shaped solid grade laminate urinal screen brings an attractive and unusual curved profile to the urinal area.

**SIDEMINDER™** Using preformed solid grade laminate elements to form a curved urinal splashback and integrated side screen brings simple, clean looks to your washroom.

## DUCT PANELLING

11

Complementary duct panelling is available in a range of colours and styles to tone in with cubicles. Choose from solid grade or high pressure laminate – solid grade allows for radiused corners and curved profiles.

Duct panels are available in full-height, cubicle-height and low-level variants. Incorporate wall panelling to continue the duct panel theme throughout the washroom area, and explore the possibilities afforded by using duct panel system to divide and reconfigure the space.
